Calculation policy - Addition

KS1 *Ones* reference the value is ones but the column is termed units*	Pupils should practise addition to 20 and within to become increasingly fluent. They should use the facts they know to derive others, e.g using 7 + 3 = 10 to find 17 + 3= 20, 70 + 30 = 100 They should use concrete objects and practical apparatus, such as bead strings and number lines to explore additions including missing numbers. Use pictorial representations such as bar models and whole part diagrams to show additive relationships. 100 squares could be used to explore patterns in calculations such as 74 +11, 77 + 9 encouraging children to think about 'What do you notice?' where partitioning or adjusting is used. Pupils should learn to check their calculations, by using the inverse. They should continue to see addition as both combining groups and counting on. They should use Dienes to model partitioning into tens and ones* and learn to rearrange numbers in different ways e.g. 23 = 20 + 3 = 10 + 13. Show understanding that adding zero leaves a number unchanged.					
Year	3			4		
Layers of vocabulary  **Appendix 1a** Beck's Tiers of Vocabulary **Appendix 1b:** Vocabulary book	**Basic to subject specific (Beck's Tiers):** +, add, addition, more, plus make, sum, total altogether score double, near double one more, two more... ten more... one hundred more how many more to make…? how many more is… than…? how much more is…? **Instructional vocabulary:** explain your method explain how you got your answer give an example of… show how you… show your working			**Basic to subject specific (Beck's Tiers):** add, addition, more, plus, increase sum, total, altogether score double, near double how many more to make…? **Instructional vocabulary:** calculate, work out, solve investigate, question answer check		
NC 2014	Add and subtract numbers with up to 3 digits, using formal written methods of columnar addition and subtraction.			Add and subtract numbers with up to 4 digits using the formal written method of columnar addition and subtraction where appropriate. Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.		
Developing Conceptual/ Procedural Understanding **NB: carried digits must be placed below the line.**	**Near doubles** 13+14 = Double 13= 26 26+1 =27 or Double 14 =28 28-1=27 **Using known facts** 40 + 80 = 120 using 4 + 8 = 12 So 400 + 800 = 1200 **Remodelling strategy**	**Start with least significant digit** 67 + 24 11 (7+4) + 80 (60+20) 91 "7 add 4 equals 11 and 60 add 20 equals 80. 1+ 0 = 1 and 1 ten + 8 tens = 9 tens" 625	**Columnar addition** 625 + 48 673 1 **Representing problems** There are 334 children at Springfield School and 75 at Oak Nursery. How many children are there altogether?	**Using known facts** 40 + 80 = 120 using 4 + 8 = 12 So 400 + 800 = 1200 and 4000+8000=12,000 **Remodelling strategy** 3548 + 1998 3546 + 2000 = 5546 **Place value materials to represent calculations**	**Columnar addition** 587 + 475 1062 1 1 "7 add 5 equals 12. That's 2 units and 1 ten to carry over. 80 add 70 equals 150 and the1 ten to carry makes 160. That's 6 tens and 100 to carry over. 500 add 400 equals 900 and the 1 hundred to carry makes 1000"	**Columnar addition (decimals) in contexts such as money and measurement** 12.45 7.36 + 24.50 44.31 1 1 1 **Representing problems** There are 259 more boys than girls in Lucy's school. If there are 789 girls, how many pupils are there altogether?

Ones reference the value is ones but the column is termed units*

Calculation policy - Addition

	243 + 198 241 + 200 = 441 **Place value materials to represent calculations** Diennes and then place value counters.	+ 48 13 (5+8) 60 (20 + 40) +600 (600 + 0) 673 All language in the context of the place value and the mental addition of the totals to be done in any order.			7648 +1486 14 (8+6) 120 (40+80) 1000 (600+400) + 8000 (7000+1000) 9134 7648 + 1486 9134 1 1 1	
Known facts	Derive and use addition and subtraction facts to 100, e.g. 33+ 67 =100.			Derive and use addition and subtraction facts (for multiples of 10) to 1000, e.g. 330+ 670=1000.		
Essential knowledge	Add single digit bridging through boundaries	Add multiples of 10,100		Fluency of 2 digit + 2 digit	Add multiples of 10, 100 and 1000	
	Partition second number to add	Pairs of 100 (complements of 100)		Partition second number to add	Decimal pairs of 10 and 1	
	Use near doubles to add	Add near multiples of 10 and 100 by rounding and adjusting		Use near doubles to add	Adjust both numbers before adding	
	Partition and recombine			Add near multiples	Partition and recombine	

Ones reference the value is ones but the column is termed units*
