SMSC in PE

Through teaching Mathematics, we can also develop children's spiritual, moral, social and cultural development.

Spiritual Development

- To enable each of our students to explore the connections between their physical wellbeing every-day life.
- To develop problem solving and an ability to question the way in which the world works.
- To see the connections between physical education, healthy lifestyles and metal state to develop personal wellbeing in everyday life.
- To understand that there are many areas in PE and sometimes we may succeed in one, whereas we my struggle in others.

Moral Development

- To use PE skills in real life contexts, applying and exploring the skills required to be successful in later life.
- To analyse performance and consider how we can improve ourselves and motivate our peers.
- To make choices and understand these may lead to various consequences.
- To question and discuss tactical concepts of all areas of physical education and share ideas with one another.

Social Development

- To use teamwork to develop tactics and improve individual performance.
- To discuss, explain and present ideas.
- To explain skills to each other and support each other in their learning.
- To become more independent and resilient learners.
- To compete against one another in sporting events, enjoying competition as well as improving personal best.

Cultural Development

- To understand how sport has developed through time and caters for all needs, abilities and backgrounds abilities.
- To understand how various approaches to sport from around the world are used and this provides an opportunity to discuss their origins.
- To develop an awareness of both the history of PE alongside the realisation that many sports we still learn today have travelled across the world and are used internationally.
